

# User Guide

## **Extension Description**

Menus have been a challenge for shop keepers for years. Especially those who have 200, 1000, or 10,000 items in their store.

One of the quickest ways to improve your store's conversion rate is to change the menu structure so that your shoppers can find products using a better and more organized structure.

### **INTRODUCING TABBED MEGA MENU FEATURES**

- **Paste inside menu: widgets, static blocks, text, images, video, etc**
- **Modify and customize each part of tab/menu/item**
- **Specify size from 1 to 5 columns and align the content section**
- **Each part of the menu are fully manageable from Magento backend**
- **Design of the menu is made based on proper html and CSS standards**
- **Menu are fully compatible with all major browsers**
- **Each part of the menu are fully manageable from Magento backend**
- **Open-source! php,phtml and CSS code opened for editing.**

## **Extension Installation**

**We made tests on all major installations and this extension is a fully workable. But It is highly recommended to backup your server files and database before installing this module. It is also recommended you install on a test server initially to carry out your own testing.**

**To install Menu follow this steps:**

**1 Clear the store cache under var/cache and all cookies for your store domain**

**2 Disable Compilation Mode (if enabled)**

**3 Log out from Magento Admin panel if you are logged in**

**4 Unpack the contents of the “extension” folder from the package file to your Magento root directory**

**If you dont use “default” folder as your theme pool directory copy files from app/design/frontend/default/default/ & skin/frontend/default/default to yours**

**5 Check that magento has permissions to read extensions files.**

**6 If Cache Control is enabled in Magento go to ‘System > Cache Management’ section, select ‘Refresh’ under ‘All Cache’ drop-down menu and press ‘Save Cache Settings’**

# Extension Usage

Fist of all check that all extension files and folders uploaded to the right place, after that Log into Magento Admin panel and go to System > Configuration > ECOMMERCEOFFICE.COM > “TabMegaMenu” section to configure the extension main settings

## Navigation menu - TabMegaMenu

To organize your catalog in drop-downs use Categories. Categories have everything that “items” have plus some extra options as top/bottom content to show additional information for current categories (images, descriptions, videos...)

You need also to enter the category id that would be shown at frontend.

The screenshot displays the Magento Admin Panel interface. At the top, there is a navigation menu with options like Dashboard, Sales, Catalog, Mobile, Customers, Promotions, Newsletter, Magazento, CMS, Blog, Banners, Reports, and System. A 'Global Record Search' box is also present. Below the navigation, a 'Latest Message' banner indicates that One Click Checkout 1.1 and iPhone Theme 1.4 by aheadWorks have been released. The main content area is titled 'Tabmegamenu Category grid'. It shows a table with 4 records found, with columns for ID, Category ID, Title, Cols, Pos, Url, Store View, and Align category. The table lists categories like 'All catalog example', 'Furniture', 'Electronics', and 'Apparel'. A dropdown menu is open over the 'Align category' column, showing options like 'Pages', 'Comments', 'Static Blocks', 'Widgets', 'Polls', 'Tabbed MegaMenu', 'Tabs / Links groups', 'Items / Links', 'Catalog Categories', and 'Settings'. Below the table, there is a 'Category Information' sidebar and a main form titled 'Edit Item 'All catalog example''. The form includes fields for Title, Url, Catalog ID, Position, Columns, Store View, Align category, Align content, Status, From Time, and To Time.

ID	Category ID	Title	Cols	Pos	Url	Store View	Align category
7	3	All catalog example	5	1	/	All Store Views	Left

## Navigation menu - TabMegaMenu

Tabs section is the main feature of this menu, so when when you done with categories and items go to the tabs section and group your items into tabs, as well as other menu items tabs can be divided between stores.

The screenshot displays a Magento storefront with a navigation menu at the top. The menu includes tabs for 'FIRST TAB', 'SECOND TAB', and 'THIRD TAB', along with links to 'VISIT ECOMMERCEOFFICE.COM' and 'VISIT MAGAZENTO.COM'. Below the tabs, there are links for 'All catalog example', 'Furniture', 'Electronics', 'Apparel', '2 column [left]', '3 columns [left]', '5 columns [right]', and 'All Categories'. A search bar is located in the top right corner, and there are links for 'My Account', 'My Wishlist', 'My Cart', 'Checkout', and 'Log In'. The main content area features a '2 columns category layout' for 'Cell Phones', 'Cameras', and 'Computers'. A callout box explains that the menu is completely changeable in the administrative section. Below the category layout, there are promotional banners for 'Buy Canon REBEL' (starting at \$499), 'FREE SHIPPING on orders over \$50', and 'Best Selling Products' (including Sony VAIO and Nine West Women's shoes). On the right side, there are sections for 'COMPARE PRODUCTS', 'MY CART', 'BACK TO SCHOOL', and 'COMMUNITY POLL'.

## Extension Troubleshooting

After the extension installation the store gives an error, or blank page, or suggests to start Magento installation procedure.

- > Change the owner of the extracted extension files to the web server user and set 775 permissions on them. Clear the store cache and try again.

There is extension tab under configuration section, or having the extension tab clicked I get a blank page, or *Access Denied* error.

- > Clear the store cache, browser cookies, logout and login again.

I've set up everything correctly, inserted the HTML code but there is nothing on that page.

- > Clear the store cache, clear your browser cache and domain cookies and refresh the page.

My configuration changes do not appear on the store.

- > Clear the store cache, clear your browser cache and domain cookies and refresh the page.

# Extension Uninstallation

You can completely disable extension if you

delete “/app/etc/modules/lp\_Tabmegamenu.xml” file or just change “true” to “false”

```

<?xml version="1.0"?>
<config>
  <modules>
    <lp_Tabmegamenu>
      <active>true</active>
      <codePool>community</codePool>
    </lp_Tabmegamenu>
  </modules>
</config>

```

But if you want to completely remove this extension from your magento installation follow this steps

1 delete extension files

2 delete record from [core\\_resource](#) table

<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	tabmegamenu_setup	1.0.0	1.0.0
-------------------------------------	--------------------------	-------------------------------------	-------------------	-------	-------

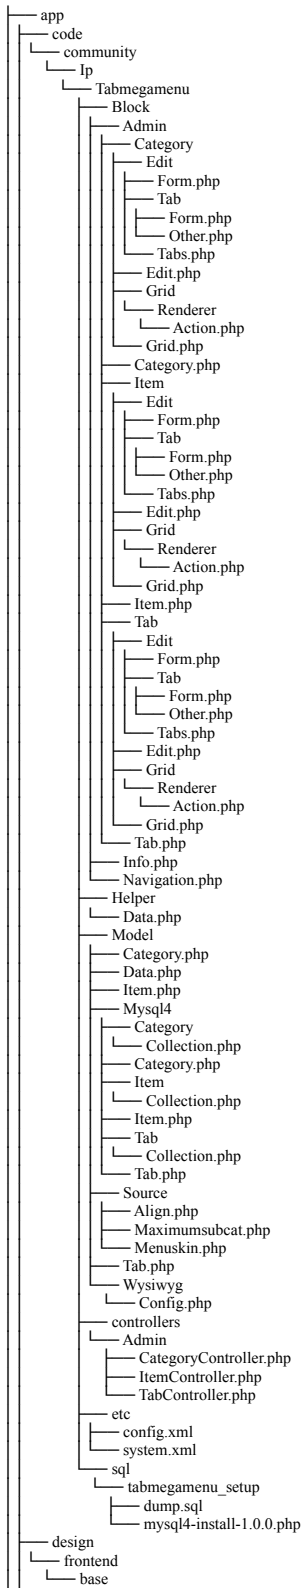

3 remove db tables from your magento database

<input type="checkbox"/>	ip_tabmegamenu_category						<input checked="" type="checkbox"/>	4	InnoDB
<input type="checkbox"/>	ip_tabmegamenu_category_store						<input checked="" type="checkbox"/>	4	InnoDB
<input type="checkbox"/>	ip_tabmegamenu_item						<input checked="" type="checkbox"/>	7	InnoDB
<input type="checkbox"/>	ip_tabmegamenu_item_store						<input checked="" type="checkbox"/>	7	InnoDB
<input type="checkbox"/>	ip_tabmegamenu_tab						<input checked="" type="checkbox"/>	5	InnoDB
<input type="checkbox"/>	ip_tabmegamenu_tab_category						<input checked="" type="checkbox"/>	6	InnoDB
<input type="checkbox"/>	ip_tabmegamenu_tab_item						<input checked="" type="checkbox"/>	8	InnoDB
<input type="checkbox"/>	ip_tabmegamenu_tab_store						<input checked="" type="checkbox"/>	12	InnoDB

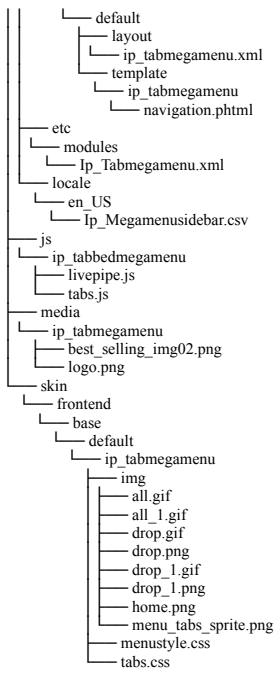

4 Remove extension extension Files & Folders tree
